Download today and have some fun! -Minor problem corrections and improvements THE OLG guys you have this is the best game I love my mother in The Trierorasang she believes it's very funny LOL once I've come out of her hands when I use it. When I first got this application I thought it was a great way of playing people and the lie device was funny but when you go to The Suwondbood and there is no way on the catch gun you can close it until you go to the menu and the other problem is that the catch gun should not be used. I think those problems will help others in the future in the future in the other I have loved this application but it needs better siren noise. I just like a siren because it's more loud but other people are so bad who you need to change the volume all the way up and it's still quiet. Also, Sounderdabood should be the same person at all times. Different sounds are confused. Besides this great game definitely worth buying. App Support Privacy Policy I love this app. With your phone hacked with a weasaur and an audio cable, you can really trick someone into thinking it's a police car. Works well, admonitions No, but I liked it a lot, I paid my box Finish them. The catch gun is cool, the lie is also cool. Sound board hit or remember, some good, some morh. Add a police car-sing. Three tips: 1: Add a light option where each color is used twice before rotation with a storbas (red red, blue blue, red, blue, red, blue, red red, blue), this most current printer these days. 2: Include options for The Uber Lights (Caution) and RedWhite (Fire/Rescue). 3: Add the ability to remotely control the application with the Apple watch (and this is the largest), complete with a PA btton, light and siren/off, and the above police car horn. Then it will be perfect Open the Mac Application Store to buy and download applications. It is so lame that only a few people post that they can claim they were :| F I R S T I \^ anaway, pulled out last night with this app. He was fast. He gave me a warning. Do not download worthless applications because they only waste your time and take place on your awesome iDevices. I liked his warning... \^, delete this application so I got this application and bought the extra pack or a few months ago, and I like the application, the lights work well and all, but just recently, my fire is not working. Everything works but when I want to play any siren it's no sound. I have my volume and sound effects all the way to my iPad, but still nothing. Can you please tell me what's wrong? If you can get me back and get a better sound than that, I'll definitely increase the app ranking. Thanks! Sometimes my friends and I throw light on their phones and put their phone in the right-of-the-car window so we can move faster at night. People actually click here.
